

Reorder and Hide Courses

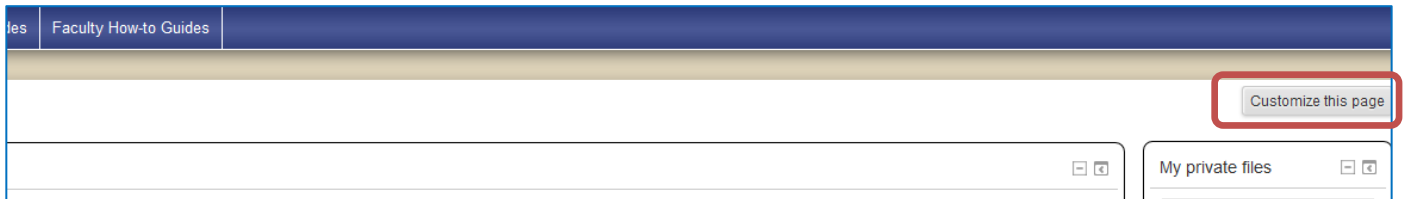

The screenshot shows the 'My Home' page with a course list. A red box highlights the 'Play Class - Jane Sim' link, with arrows pointing to it from a text box that says 'Reorder courses to display a convenient, logical list.' Another red box highlights the 'Jane Test Course' link, with arrows pointing to it from a text box that says 'Hide courses you don't want displayed from the list.'

Reorder Courses

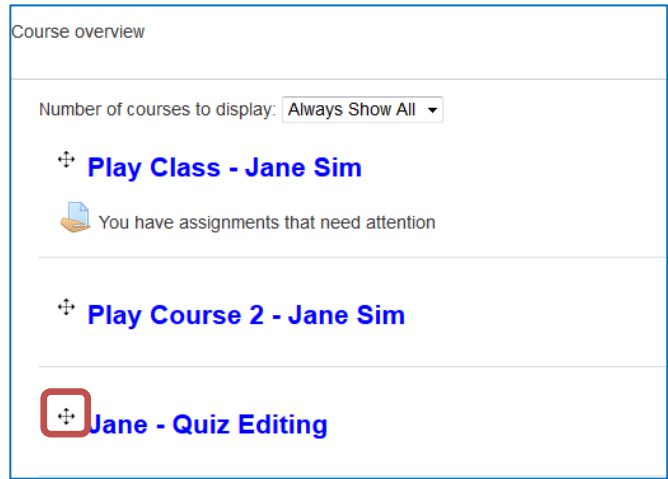

1. Go to the **My Home** tab.

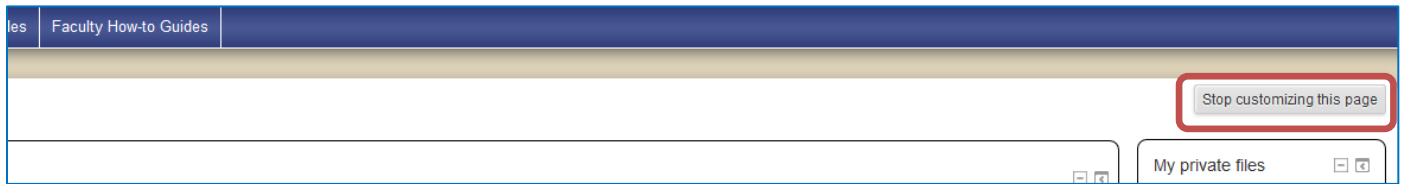

2. Select **Customize this page**.

3. Select the **move icon** next to the course to be moved.
4. Hold the **move icon** and drag the course to a new order.
5. Repeat until courses are in the desired order.

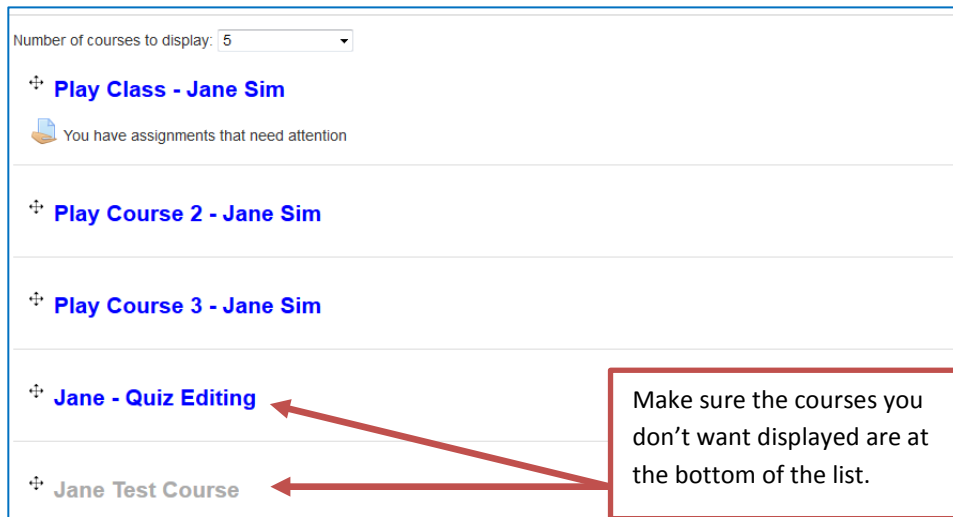

6. Select **Stop customizing this page**, or continue to the next steps to hide unused courses.

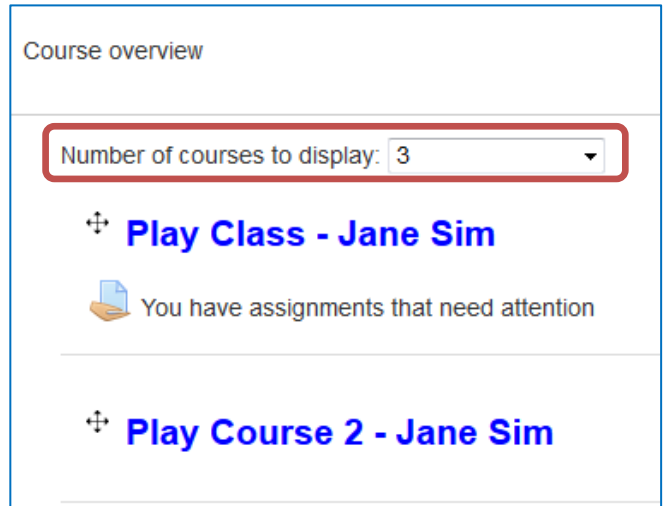

Hide Courses

Hide courses you don't want displayed once you've reordered your list.

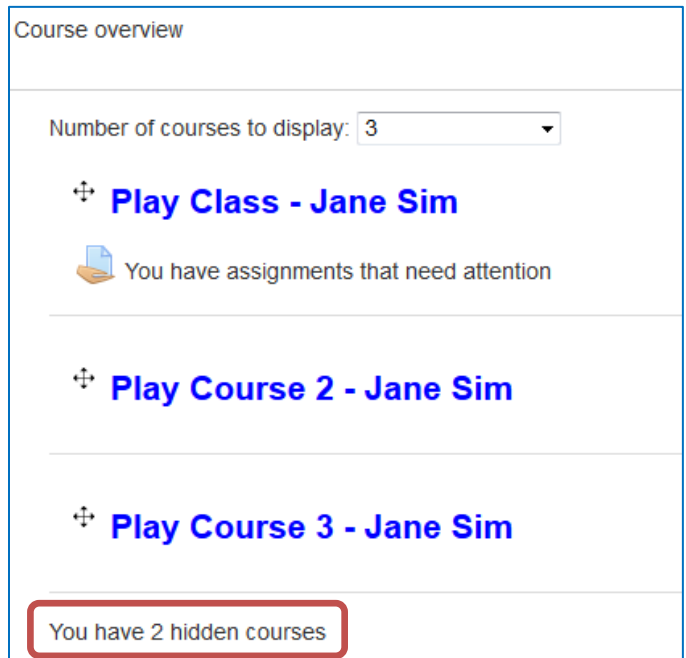

1. From the **Number of courses to display** dropdown, select the appropriate number of courses to display.

(In my case, the appropriate number is 3.)

2. Notice which courses are now displayed and the statement of how many courses are now hidden.

3. Select **Stop customizing this page**.
