Mission Statement

The mission of the College of Education Community is to collaboratively transform public education by preparing thoughtful educators and advancing professional practices. We are committed to diversity, educational equity, and social justice, exemplified through reflective teaching, life-long learning, innovative research, and ongoing service. Our practices demonstrate a commitment to student centered education, diversity, collaboration, professionalism, and shared governance.

(adopted by COE Governance Community October, 1997)

California Commission on Teacher Credentialing Standards. This course has been aligned with the Standards of Program Quality and Effectiveness for the Reading Certificate and Reading Specialist Credential (1998) as approved by the California Commission on Teacher Credentialing. These standards have been integrated thematically throughout the courses offered by the Literacy Program in the College of Education. Particularly, this course addresses the following standards: intervention strategies at early and intermediate levels (research-based intervention models); areas of study related to reading and language arts: certificate level; application of research-based and theoretical foundations; leadership skills and professional development; research methodology; areas of study related to reading and language arts: specialist level; analysis and application of research; and advanced professional perspective.

Course Description. This course focuses on the in-depth and critical examination of (1) reading and writing processes and their interrelationships; (2) linguistic, cognitive, developmental and sociocultural aspects of literacy; (3) current reading and writing research; and (4) the implications of current research for classroom practice, curriculum development and assessment.

Course Objectives:

- To gain a broad theoretical understanding of reading and writing development according to multiple perspectives.
- To examine research on reading and writing processes.
- To become familiar with and critically analyze research methodologies applied to research in reading and writing.
- To examine the implications of theories and research on reading and writing for classroom practice, curriculum development and assessment.
- To develop experience in writing a professional paper.

Required Texts and Readings:

American Psychological Association. (1994). *Publication manual of the American Psychological Association* (4th ed.). Washington, DC.

Powell, J. (2003). *EDUC 610: Reading and Writing Theory and Research*. Available at Copyserve.

* CopyServe is located in San Marcos at 745 Rancho Santa Fe Rd. (the corner of San Marcos and Rancho Santa Fe; look for the shopping center that contains Savon and City Bank, CopyServe faces San Marcos Blvd, open until 6:00) Tel. (760) 599-9923

Course Assignments:

Attendance and Participation: (50 points)

Ten points will be deducted for each 24 hour period in which assignments are late. Students are expected to arrive on time and participate in each session. Important: You cannot receive an “A” if you miss more than two classes. You cannot receive a “B” if you miss more than three classes.

Leading a Reader Response Discussion (100 points)

In pairs, present short overviews (15-20 minutes) of the readings for arranged class sessions and then lead a critical discussion (50-60 minutes) on those readings. The discussion must include small and whole group activities, the use of handouts and overheads, and the reaction papers.

Reaction Papers (10 points each)

Reaction papers are due the same day as the readings. Prepare a typed, one page bulleted list of your opinions of the positive and negative aspects for each of the assigned readings. Remember that these are reaction/opinion statements, *not summaries*.

Research Project Outline and Presentation (100 points)

Based on your classroom/school experiences, course readings and puzzling questions, select a topic you would like to further investigate. Write a project outline (six to eight pages) including:

- (1) A *brief introduction* of why you think this topic is relevant and how your study will contribute to the educational field (2 to 4 paragraphs).
- (2) A bulleted *ANNOTATED* list of relevant research that will help you develop a broad overview of what is known about this topic and how it has been studied. This is an outline of what research would be important to include in a *literature review* – studies that support your view on this topic (and the theoretical framework guiding your study) as well as studies that bring a different perspective(s). Include a rationale for your selection of references (minimum of 10 references).
- (3) Select a *research methodology* that will best help you answer your question(s). Include information on where/when/how you would collect the data – setting, participants, timeline and data collection procedures.
- (4) Prepare a 15 minute presentation to be given to the class about your project outline. Include a one-page summary and reference page.

Important: Before you turn in your final paper, you must have the signatures of two classmates who have responded to and edited your work on the first draft.
