

**Cal State University San Marcos  
College of Education**

**EDEX 639: Using Data Based Instruction to Improve Instruction and Learning**

**Fall 2005   3 units   CRN: 41229   Online course—WebCT**

**Instructor: Leslie Mauerman, M Ed.**

Office: University Hall 212   Phone: (760) 750-8210 voicemail only

Best mode of communication is Email: [lmauerma@csusm.edu](mailto:lmauerma@csusm.edu)

Office Hours: Virtual:--online--Wednesdays 3:00-5:00, and by appointment

**Mission Statement of the College of Education, Cal State San Marcos**

The mission of the College of Education Community is to collaboratively transform public education by preparing thoughtful educators and advancing professional practices. We are committed to diversity, educational equity, and social justice, exemplified through reflective teaching, life-long learning, innovative research, and on-going service. Our practices demonstrate a commitment to student-centered education, diversity, collaboration, professionalism and shared governance.

**DBI Course Description**

EDEX 639: Using Data-Based Instruction to Improve Teaching and Learning is intended for practicing general and special education teachers in the elementary school, middle school, who are interested in learning "best practices" in educating students with learning challenges, including those students specified by IDEA, students who are English learners, students with gifts and talents, and students with multiple handicaps. EDEX 639 will also support you as you document your competencies for meeting the needs of students from ethnically/linguistically diverse cultures who qualify for special education.

EDEX 639 will show you how to meet the competencies for Level II Specialists Credential in California. (Note: Keep track of your work; you will be asked to show evidence for these competencies at the end of the course!) Another 'bonus' of this course is, by virtue of completing the course *online*, you will also demonstrate technology-related competencies.

The broadest goal of this course is to empower participants to work individually or as members of a team to design, implement, evaluate, and redesign instructional programs for students with special education needs, so as to increase students' abilities to learn, live, and prosper in the most appropriate and inclusive instructional environment possible.

The overall purpose of the course is to use the framework of Collaborative Action Research to help you discover the interrelationships among instructional methods and materials and the academic and social interactions of learners with exceptional needs. Indeed, you'll learn to avoid those instructional management systems that literally produce maladaptive behaviors!

**Course Objectives**

1. List and explain effective instructional organization and delivery strategies.
2. Relate research-based literature to effective instructional organization and delivery strategies.
3. Diagnose and assess student learning prior to instruction to:
  - a) understand the nature of the student's special education needs, and
  - b) determine appropriate level of difficulty.
4. Design an effective instructional organization and delivery strategies to improve student learning.

5. Design a measurement system to:
- a) assess a special student's learning during instruction,
  - b) monitor student progress,
  - c) make data-based decisions,
  - d) alter instructional strategies as needed, and
  - e) summarize results using a professional reporting system.

## Required Readings

Selected sections of Lovitt (2000) will be assigned along with abstracts of research related to a variety of effective teaching practices. Abstracts by Ann Nevin, Jacque Thousand, and Toni Hood are available: [Effective Teaching Abstracts](#)

As professional educators, there is an expectation that course participants will continue to select and compile other sources (favorite web sites, movies, videos, curriculum materials, and textbooks) to enhance their growth in areas of personal interest to them.

**\*Lovitt, Thomas. (2000). *Preventing School Dropouts*. Austin, TX: PRO-ED. ISBN 0-89079-824-9.**

*This book is selected because of its wide range of examples of applying researched best practices to various academic subjects.*

**\* Sagor, Richard. (1992). *How to Conduct Collaborative Action Research*. Alexandria, VA: Association for Supervision and Curriculum Development. ISBN 0-87120-201-8.**

*This book is selected because of its wide range of examples of action research in schools and communities.*

**\* Lovitt's APPENDIX A**

***(Note: This appendix is only available in our 639 WebCT course. It is not available in the bookstore. Please print a copy of Appendix A.)***

## Infused Competencies

### Authorization to Teach English Learners Senate Bill (SB) 2042

This credential program has been specifically designed to prepare teachers for the diversity of languages often encountered in California public school classrooms. The authorization to teach English learners is met through the infusion of content and experiences within the credential program, as well as additional coursework. Students successfully completing this program receive a credential with authorization to teach English learners. See "Authorization to Teach English Learners Competencies." (Approved by CCTC in SB 2042 Program Standards, August 02)

### **Special Education**

Consistent with the intent to offer a seamless teaching credential in the College of Education, this course will demonstrate the collaborative infusion of special education competencies that reflect inclusive educational practices.

### **Technology**

This course infuses technology competencies to prepare our candidates to use technologies, emphasizing their use in both teaching practice and student learning. Candidates are expected to use technology as part of their professional practice, as well as to research the topics discussed in this course.

### **Accommodation for Disabilities**

Students requiring reasonable accommodations need to contact Disabled Student Services in order to make the necessary arrangements. This organization is located in Craven Hall, room 5025a, and can be reached by telephone at (760) 750-4905 or (760) 750-4909 (TDD users).

### **COE Attendance Policy**

Due to the dynamic and interactive nature of courses in the College of Education, all students are expected to attend all classes and participate actively. At a minimum, students must attend more than 80% of class time, or s/he may not receive a passing grade for the course at the discretion of the instructor. Individual instructors may adopt more stringent attendance requirements. Should the student have extenuating circumstances, s/he should contact the instructor as soon as possible.

### **HOW MUCH TIME WILL I SPEND EACH WEEK ON THIS COURSE?**

#### **The EDEX 639 Online Graduate Course Attendance Policies**

The EDEX 639: Using Data Based Instruction is an online course. It is a graduate class offered by the College of Education at CSUSM. It carries the same responsibilities for graduate level work as any campus-based class. Candidates for the M. Ed. and Level II Education Specialist credential are expected to attend class (at least 3 hours per week).

The online analog of class attendance is comprised of composing and submitting essays to address Focus Questions in the Private Mail system to the instructors on a weekly basis; Substantive class discussion on topics as shown by Postings to the Discussion Board; Completion of Modules according to the Course Schedule; and visits to the lectures provided within the course.

M. Ed. and Level II Education Specialist candidates are also expected to prepare essay responses that show integration of course lectures, relevant aspects of the textbooks required for class, and selected (by the candidate) relevant research articles in web-based and print-based journals. The time commitment for such preparation at the graduate school level is typically calculated as about 2-3 hours of study time for each hour of credit each week. That translates to about 4-6 hours of preparation time for a 3-credit-hour class.

M. Ed. and Level II Education Specialist candidates are also expected to prepare essay responses that show integration of course lectures, relevant aspects of the textbooks required for class, and selected (by the candidate) relevant research articles in web-based and print-based journals. The time commitment for such preparation at the graduate school level is typically calculated as about 2-3 hours of study time for each hour of credit each week--that translates to about 4-6 hours of preparation time for a 3-credit-hour class.

## Outcomes-Based Instruction

The emphasis in EDEX639 is on *outcomes*. The instructors rely on a mastery teaching/learning process, and are available to coach and teach explicitly how to write essays at the graduate level. Candidates have opportunities to revise and resubmit their essays within the allotted semester time limits, based on corrective and substantive critiques from the instructors. However, the policy (adopted in 1992) is that M. Ed. and Level II Education Specialist credential candidates must attend 80%-100% of their class sessions in order to receive credit in their graduate program. Thus, if there is no substantial evidence documenting online participation at the 80-100% level, then candidates may not receive a passing grade (no matter how excellent actual outcomes are).

## Attendance Guidelines

For EDEX639 online, the following guidelines will apply:

If *attendance* is between 80-100%, then the highest grade the participant can earn is **A**.

If *attendance* is between 70-79%, then the highest grade the participant can earn is a **B**.

If *attendance* is between 60-69%, then the highest grade the participant can earn is a **C**.

If *attendance* is less than 59%, the grade is an **F**.

## Teacher Performance Expectations (TPEs) for EDEX 639

**TPE 2 *Monitoring Student Learning During Instruction*:** Determining student progress toward achieving the state-adopted academic content standards; Using instructional strategies and techniques to support students' learning

**TPE 6D *Special Education*:** Developing modifications and adaptations in curriculum assessment and instruction for students with special needs

**TPE 9 *Instructional Planning*:** Establishing academic learning goals; connecting academic content to the students' backgrounds, needs, and abilities; selecting strategies/activities/materials/resources

**Tentative Course Schedule for EDEX 639      Fall 2005**

**Key:**      **DB**= Discussion Board      **PM**= Private Mail      **SHP**= Student Homepage
