EDUC 500 COMPUTER-BASED TECHNOLOGY IN
EDUCATION
CRN 41769 (01): 3 units

INSTRUCTOR: Denise Hogan

Class location: 271 University Hall

Phone: (760) 750-8239

Email: _____@csusm.edu OR dhogan@sdcoe.k12.ca.us

Class: Monday; 7:00-9:45 PM

Office hours: before and after class, and by appointment

COURSE DESCRIPTION:

In December of 1998, the CTC adopted a new technology stand for Multiple and Single Subject Teaching Credential candidates. The new technology standard requires credential candidates to 1) demonstrate their effective use of technology at a “basic” level (Level I) prior to issuance of a preliminary credential; and 2) demonstrate their effective use of technology at an “advanced” level (Level II) prior to issuance of a professional clear credential. The purpose of this class is to prepare credential candidates to meet this new technology standard.

Standard 20.5 – Use of Computer-Based Technology in the Classroom

Candidates are able to use appropriate computer-based technology to facilitate the teaching and learning process.

This class emphasizes the curricular implications of computer-based technologies in education. It has been designed to work in tandem with other course in the Teacher Education Program in meeting the California State requirement for computer education course work to obtain a preliminary teaching credential. If you are entering the teacher education program, you will be challenged to use what you have experienced in educational settings, EDUC 350, and what you know about teaching children. If you are already teaching in the classroom you will be encouraged to apply what you are learning in educational settings.

PREREQUISITE

Successful completion of the CSUSM Computer Literacy requirement or approval of instructor. This course is designed to enable decision-making regarding the use of computers to an educational setting. It does not cover instruction of basic computer competencies.

REQUIRED TEXT AND MATERIALS

- ◆ *Teachers Discovering Computers: Integrating Technology in the Classroom* (Shelly and Cashman)
- ◆ Five disks 1.4 MB, PC or Mac Format (Label your name on each.)
- ◆ Pay for Print Card: May be purchased in Academic Hall 202
- ◆ Optional- Zip disk for heavier duty storage of Multi-media files

HIGHLY RECOMMENDED

NETS for Students: Connecting Curriculum and Technology. (2000). International Society for Technology in Education (ISTE) ISBN 1-56484-150-2

OPTIONAL RESOURCES

- Bowers, C.A. 1988. *The Cultural Dimensions of Educational Computing.* Teachers College: New York, NY.
- Cummins, Jim and Sayers, Dennis. 1995 *Brave New Schools: Challenging cultural literacy through global learning networks.* St. Martin's Press: NY.
- National Educational Technology Standards for Teachers: *NETS Book*

COE Mission Statement

The mission of the College of Education Community is to collaboratively transform public education by preparing thoughtful educators and advancing professional practices. We are committed to diversity, educational equity and social justice, exemplified through reflective teaching, life-long learning, innovative research and on-going service. Our practices demonstrate a commitment to student centered education, diversity, collaboration, professionalism, and shared governance.

COURSE OBJECTIVES:

This class will help you to:

- ◆ Gain proficiency in the use of computers
- ◆ Make informed and critically reflective decisions regarding the choice, use and creation of educational technology applications

The following required competencies for all California teachers have been established by legislation. Commencing January 1, 2000, the minimum requirements for the preliminary multiple subject or single subject credential include demonstration of the ability to do the following:

- 1) Identify issues involved in the access to, use of, and control of computer-based technologies, including, but not limited to:
 - a) The impact of technology upon the learning process;
 - b) The moral, legal, and ethical implications, including copyright infringement;
 - c) The economic and social implications of that access, use, and control, including the need to provide equitable access to technology.

- 2) Demonstrate, within appropriate subject areas and grade levels, the application and use of computer-based technology as a tool to enhance the development of problem solving skills, critical thinking skills, or creative processes through course-based projects and demonstrations lessons. Demonstrate knowledge of basic operations, terminology, and capabilities of computer-based technology and the use of computer hardware, software, and system components.
- 3) Appropriate to the subject area and grade level, demonstrate a basic understanding of and ability to use representative programs from each of the following categories:
 - a) Computer applications and electronic tools, such as word processing, data bases, graphics, spreadsheets, telecommunications (including email), portfolio management;
 - b) Technology-based activities, such as simulations, demonstrations, tutorials, drill and practice, and interactive software;
 - c) Utility programs for classroom administration, such as those for record keeping, gradebook, lesson planning, generating instructional materials, and managing instruction.
- 4) Demonstrate the application and use of computer-based technologies as tools to enable the development of problem-solving skills, critical thinking skills, and creative processes. Examples of such skills and processes are: gathering and analyzing data, generating and testing hypotheses, classifying, comparing and contrasting, inferring, evaluating and composing and designing.

ADMINISTRATIVE REQUIREMENTS OF STUDENTS

This class will utilize distributed learning instructional strategies. Students must keep up with class assignments from week to week and will need to complete the lab assignments in both on-campus or off-campus locations. Plan to spend up to seven hours out of class each week to complete required readings, communicate with email, complete or expand lab assignments and to gain familiarity with educational technology applications.

Students are required to keep a copy of all work and are expected to submit examples of best practice for their portfolio evaluation. All proof of work accomplished is the responsibility of the student. Students will construct a notebook, portfolio, including disk(s) of the work done over the semester to serve as a professional portfolio and sampling of technology accomplishments. In some cases assignments may be completed within the allotted class time.

Please be sure to read and understand the CSUSM policy on plagiarism and cheating, as it will be strictly enforced. Academic dishonesty including plagiarism or copyright infringement will be reported to the University and will result in a course grade of F.

ATTENDANCE POLICY

Due to the dynamic and interactive nature of this course, all students are expected to attend specifically designated classes and communicate regularly with email study groups and instructor to participate in distributed learning activities. Attendance for Ed500 is measured by the degree of active participation both online and in class, the quality of lab assignments, and the degree of investment as evidenced by positive interaction with professor and peers. Should the student have extenuating circumstances, s/he should contact the instructor as soon as possible.

REQUIREMENTS AND EVALUATION:

California State University San Marcos has adopted an all-university writing requirement. In each course, students are required to write at least 2500 words in essays, exercises, papers and examinations.

Quizzes, Labs, and Assignments

Quizzes will cover any material taught during the class lessons or assigned readings. Labs will reflect work done at the computers. Assignments will be made to reinforce concepts covered in class and to provide adequate practice. Dependability and promptness are expected. Late assignments will receive reduced points. If you find you cannot be in class, please make sure another class member delivers your assignment. All assignments should be prepared in a digitized format and printed out free of spelling and/or grammar mistakes. Back up your work regularly. (Note: Email and WebCT assignment = 5 points each; all other assignments = 10-15 points; Quiz = 30 points).

Assignment Evaluation

Maximum points for an assignment (may be 15, 10 or 5 points) will be given when: all components of the assignment have been completed to the fullest extent and submitted on time, no grammar or spelling errors are evident, and student has shown understanding of the course concepts addressed in the assignment. Points are deducted for late or incomplete work, or when the quality of the work does not reflect a graduate level.

Portfolio Assessment and Final Project

Critical Analysis: This class requires that you engage in self-reflection to assess the degree to which you have comprehended and are able to apply the concepts covered in this class. You are required to create a portfolio of appropriate samples from your class assignments that you believe best reflect your progress and growth. These may include, but not be limited to the following: samples of word-processed documents, database or spreadsheet projects, PowerPoint or Hyperstudio presentations, and telecommunication assignments. (Your portfolio will be submitted with 6 samples and reflections, organized in a folder with a table of contents.)

Reflection: From your portfolio samples, select two that are most meaningful to you. Using a word processor, compose a critical reflection describing (a) why you selected these two to write about, (b) what did you enjoy about completing them? (c) what challenges did they present? (d) how did

you overcome any obstacles? (e) what did you learn from those assignments? And most importantly.....(f) how would you change your work now that you have had time to reflect? (These questions equal three double spaced, 12-point Times Roman Font pages, which are submitted within your portfolio.)

Synthesis: From the items in your portfolio, select one application that you would like to investigate further. Develop a project beyond what the original assignment required. Expand your skills in the application to a higher degree (instructor approval required). The goal of this component is to demonstrate your ability to identify, act on, and achieve goals for self-learning with educational applications of technology. (Final Project). This project will be presented to the class prior to the week of finals.

Application: Using the Lesson Plan Template specified, create a lesson utilizing technology to teach a particular content or skill (developed in the final project). Describe the target population (including age), curriculum standards, instructional objectives, instructional plan for implementation, and methods of evaluation. If you have not previously taught in the classroom, take your plan to a classroom teacher and get feedback before you present to our class. This lesson plan will coincide with the Synthesis (Final Project). Make enough copies to give each member of our class a copy when you present.

CLASS INVESTMENT

Your investment in this class is demonstrated through regular class attendance and participation, through active, constructive and creative contributions – both online and in class, and through participation in cooperative collaborative learning. The past experience, teaching and computer expertise of class members will benefit everyone and provide a valuable resource for the class.

- 50% = labs and assignments
- 30%= quizzes, portfolio and final project
- 20%= class investment (attendance and participation)

GRADING PROCEDURE AND ASSIGNMENTS

Grading is calculated on the standard of

94-100 = A	87-89=B+	80-83=B-	74-76=C	60-69=D
90-93=A-	84-86=B	77-79=C+	70-73=C-	Below 60=F

Note – You must have a B average in your teacher education courses.

Statement of CLAD Emphasis

In 1992, the College of Education voted to infuse Crosscultural, Language and Academic Development (CLAD) competencies across the curriculum. The CLAD competencies are attached to this syllabus and the competencies covered are highlighted.

Definitions

The following definitions are applied from SEC. 2. Section 44259.3 Education Code:

- 1) “Educational technology” means the use of computer-based technology in instruction.
- 2) “Computer-based technology” means technologies based on the computer, such as telecommunications, interactive video, and compact disks.
- 3) “System components” means hardware and inclusives, but is no limited to printers, monitors, modems, disk drives, scanners, video capture devices, video projection devices, compact disk-read only memory (CD-ROM), and other peripherals that work together in a system.
- 4) “Telecommunications” means the use of computers, modems, and telephone lines to move voice, video information, and data over distances.
- 5) “Networking” means terminals or computers, or both, linked for the purpose of moving information and data over distances.
- 6) “Course-based project” means and end of course or challenge requirement for the purpose of demonstrating technology competency, especially computer centered subject area expertise.
- 7) “Authoring software” means text, graphics, photos, pictures, video, and sound are typically sewn together into a project using authoring software. These software tools are designed to manage multimedia elements and provide user interaction.

EDUC 500 COMPUTER-BASED TECHNOLOGY IN EDUCATION
 CRN 41769 (01): 3 units

INSTRUCTOR: Denise Hogan

Week	Topic	Assignments
1 8/27 *no class next Monday	Basic Skills, Standards for Technology, Word processing	<ul style="list-style-type: none"> CTAP Online assessment – record your log-in name and password 3 paragraph, word processed, introductory letter in which you describe your experience in education, your experience with educational technology and your expectations for this class- hard copy due next class period Read Chap.1 of text (Supplement on online at http://sesite.com/tdc) - define the vocabulary for this chapter, OR for extra points make a crossword puzzle with the words at puzzlemaker.com
2 9/10	Internet Issues of access to technology	Email to collaborate Web worksheet – due next class period Read Chap.2
3 9/17	Email, Intro & attachments, uses in classrooms parents, students, key-pals	Seven Steps Activity- due next class period Read Chap.3
4 9/24	Threaded discussions, desktop publishing	WebCT, threaded discussion on readings Class Newsletter Read Chap.4
5 10/1	New Technologies, Videoconferencing with Katie Beedon of PacBell and Marycay Densmore, IPACS & wireless, streaming video	Email reflection on uses of the web for accessing information Read Chap.5
6 10/8	Evaluate software with MTV?	Rubric to evaluate 3 kinds of software
7 10/15	Presentation software, PowerPoint and Hyperstudio	Multimedia lesson
8 10/22	MIDTERM Database, spreadsheets, grading programs	Set up a gradebook to organize information for a student project
9 10/29	Copyright issues with Stacey Campo & Effective uses of Technology Professional Reading	Email reflection on copyright and ethical use Email ideas for final projects

10 11/5	Teacher web pages	Create an online resource for students
11 11/12**	Virtual class=attend a video conferencing session (no class meeting at CSUSM)	Email reflection on video conferencing
12 11/19	Use of the web in curriculum, Relate technology to content – webquests, filamentality	
13 11/26	Management Effective uses of technology	
14 12/3	Present final projects	
15 12/10	Present final projects
