

**CALIFORNIA STATE UNIVERSITY SAN MARCOS
COLLEGE OF EDUCATION
EDMS 545 Science Education
Spring 2007 Monday 1:00-3:45 UH460**

Instructor: Dr. Kathy I. Norman
Office: 311 Univ. Hall
Phone: 760-750-4314

Office Hours: after each class and by apt. Please feel free to call or email me to set up a convenient time to meet.
E-mail: knorman@csusm.edu

COE MISSION STATEMENT

The mission of the College of Education Community is to collaboratively transform public education by preparing thoughtful educators and advancing professional practices. We are committed to diversity, educational equity, and social justice, exemplified through reflective teaching, life-long learning, innovative research, and on-going service. Our practices demonstrate a commitment to student-centered education, diversity, collaboration, professionalism and shared governance.
(adopted by COE Governance Community, October 1997)

COURSE DESCRIPTION

This course is designed to provide a comprehensive overview of the objectives, skills, concepts, experiments, materials, and methods necessary to teach science to elementary school children. A series of team activities will provide you with first-hand experiences in these areas. This course focuses on instructional methods, techniques, materials, lesson planning, curriculum development, organization and assessment in science. The integration of curricular areas is addressed. Methods of cross-cultural language and academic development will be integrated into the course.

REQUIRED TEXTS

Friedl, A.E. & Koontz, T.Y. (2005). *Teaching Science to Children, An Inquiry Approach, 6th Ed.* NY: McGraw-Hill.
Science Framework for California Public Schools. (2003) Sacramento: California Dept. of Education.
Lamb, R. *Communication Basics: An Overview of Nonviolent Communication.* Center for Nonviolent Communication.
Large Blue Books

COURSE OBJECTIVES

By the end of this course, students should be able to

1. Demonstrate proficiency with inquiry skills of observing, measuring, inferring, classifying, predicting, verifying predictions, hypothesizing, isolating variables, interpreting data, and experimenting.
2. Identify exemplary materials (curriculum kits, science programs, textbooks, equipment, technology, ancillary materials) appropriate for elementary school children.
3. Demonstrate knowledge and understanding of the California Science Framework, the California Science Content Standards, and the National Science Education Standards.
4. Demonstrate an understanding of the physical, earth and life science concepts included in the K-8 California Science Content Standards, and how to design lessons to teach the concepts.
5. Use the Learning Cycle model of instruction to teach science in a contemporary manner.
6. Use technology in elementary science teaching.
7. Demonstrate confidence in leading and performing investigations designed to teach science concepts, science process skills, and scientific attitudes.
8. Use authentic methods of assessment to evaluate learning of science concepts and processes.
9. Design an elementary science teaching mini-unit.
10. Practice strategies to include all students in science (linguistically and culturally diverse, students with disabilities and other students with special needs).

COURSE TOPICS

Constructivism & The Learning Cycle Model of Teaching
Concept Mapping
Objectives for Student Learning & Science Concept Definitions
Developing Essential Questions
California Science Content Standards
California Science Framework
Teaching English Language Learners in Science
Infusing Writing Activities in Science Lessons
Science Curriculum Kits and State Approved Texts
Science Process Skills and Scientific Attitudes
Current Issues in Science Education
Infusing Technology into Science Teaching
Authentic Assessments in Science
Science Projects, Student Research, Science Fairs
Safety in the Science Class
Inclusion and Teaching Science to Students with Special Needs
Benchmarks and the National Science Education Standards

Teacher Performance Expectation (TPE) Competencies

Standards of Quality and Effectiveness for Professional Teacher Preparation Programs

California Commission on Teacher Credentialing

The course objectives, assignments, and assessments have been aligned with the CTC standards for the Multiple Subject Credential. This course is designed to help those seeking a California teaching credential to develop the skills, knowledge and attitudes necessary to assist schools and districts in implementing effective programs for all students. The successful candidate will be able to merge theory and practice in order to realize a comprehensive and extensive educational program for all students. You will be required to formally address the following TPEs in this course: TPE 1A and TPE5. To successfully meet these TPEs, you should respond on TaskStream, attach your evidence, and request feedback from me on TaskStream.

****NOTE: Entries for TPE 1A and TPE 5 will be completed during the last class session. If you do not post the entries as directed and turn in a printout, you will not receive the grade for TPEs.**

TPE 1A: Teaching Science in a Multiple Subject Assignment

Candidates for a Multiple Subject Teaching Credential demonstrate the ability to teach the state-adopted academic content standards for students in science (K-8). They balance the focus of instruction between science information, concepts, and investigations. Their explanations, demonstrations, and class activities serve to illustrate science concepts and principles, scientific investigation, and experimentation. Candidates emphasize the importance of accuracy, precision, and estimation.

TPE 5: Student Engagement

Candidates for Teaching Credentials clearly communicate instructional objectives to students. They ensure the active and equitable participation of all students. They ensure that students understand what they are to do during instruction and monitor student progress toward academic goals. If students are struggling and off-task, candidates examine why and use strategies to re-engage them. Candidates encourage students to share and examine points of view during lessons. They use community resources, student experiences, and applied learning activities to make instruction relevant. They extend the intellectual quality of student thinking by asking stimulating questions and challenging student ideas. Candidates teach students to respond to and frame meaningful questions.

Attendance Policy

Due to the dynamic and interactive nature of courses in the College of Education, all students are expected to attend all classes and participate actively. Absences and late arrivals/early departures will affect the final grade. At a minimum, students must attend more than 80% of class time, or s/he may not receive a passing grade for the course at the discretion of the instructor. Individual instructors may adopt more stringent attendance requirements. Should the student have extenuating circumstances, s/he should contact the instructor as soon as possible.

For this class, **if you are absent 1 day, your highest possible grade is a B. If you are absent more than 1 day, your highest possible grade is a C**, which means that you will not pass the course. **Late arrivals and early departures** will lower your class grade. If you have an emergency, see the instructor for the Emergency Absence Policy. Absences do not change assignment due dates. Late assignments will not be accepted.

Late Work

Complete all assignments on time. No late work will be accepted.

Students With Disabilities Requiring Reasonable Accommodations

Students must be approved for services by providing appropriate and recent documentation to the Office of Disabled Student Services (DSS). This office is located in Craven Hall 5205, and can be contacted by phone at (760) 750-4905, or TTY (760) 750-4909. Students authorized by DSS to receive reasonable accommodations should meet with their instructor during office hours or, in order to ensure confidentiality, in a more private setting.

CSUSM Academic Honesty Policy

Students will be expected to adhere to standards of academic honesty and integrity, as outlined in the Student Academic Honesty Policy. All written work and oral assignments must be original work. All ideas/materials that are borrowed from other sources must have appropriate references to the original sources. Any quoted material should give credit to the source and be punctuated with quotation marks.

Students are responsible for honest completion of their work including examinations. There will be no tolerance for infractions. If you believe there has been an infraction by someone in the class, please bring it to the instructor's attention. The instructor reserves the right to discipline any student for academic dishonesty in accordance with the general rules and regulations of the university. Disciplinary action may include the lowering of grades and/or the assignment of a failing grade for an exam, assignment, or the class as a whole.

All University Writing Requirement

In keeping with the All-University Writing Requirement, all courses must have a writing component of at least 2,500 words (approximately 10 pages) which can be administered in a variety of ways.

Person-First Language

Use "person-first" language in all written and oral assignments and discussions (e.g., "student with autism" rather than "autistic student").

Course Prerequisites

Course prerequisites include admission to the program, successful completion of the Semester 1 courses, and successful completion of the Beginning Student Teaching experience.

Authorization to Teach English Learners

This credential program has been specifically designed to prepare teachers for the diversity of languages often encountered in California public school classrooms. The authorization to teach English learners is met through the infusion of content and experiences within the credential program, as well as additional coursework. Students successfully completing this program receive a credential with authorization to teach English learners. (approved by CCTC in SB 2042 Program Standards, August 02))

Special Education

Consistent with the intent to offer a seamless teaching credential in the College of Education, this course will demonstrate the collaborative infusion of special education competencies that reflect inclusive educational practices.

Technology

This course infuses technology competencies to prepare our candidates to use technologies, emphasizing their use in both teaching practice and student learning.

Visual and Performing Arts

This course infuses the visual and performing arts in order to prepare our candidates with the skills to integrate the arts in their teaching. The Visual and Performing Arts Content Standards for California Public Schools (<http://www.cde.ca.gov/cdepress/standards-pdfs/visual-performing-arts.pdf>) describe what every student should know and be able to do in the visual and performing arts, pre-kindergarten through grade 12 in five strands: artistic perception; creative expression; historical and cultural context; aesthetic valuing; and connections, relationships and applications.

GRADING STANDARDS

A = 93-100	B = 83-86	C = 73-76
A- = 90-92	B- = 80-82	C- = 70-72
B+ = 87-89	C+ = 77-79	F = 0-69

It is expected that students will proofread and edit their assignments prior to submission. Students will ensure that the text is error-free (grammar, spelling), and ideas are logically and concisely presented. The assignment's grade will be negatively affected as a result of this oversight. Each assignment will be graded approximately 80% on content and context (detail, logic, synthesis of information, depth of analysis, etc.), and 20% on mechanics. All citations, where appropriate, will use American Psychological Association (APA) format. Consult APA Manual, 5th edition for citation guidance.

You must maintain a B average (3.0 GPA) in your teacher education courses to receive a teaching credential from the State of California. Courses are not accepted if final course grades are below a C+.

ASSIGNMENTS

Each written assignment is expected to have a clear organizational presentation and be free of grammar, punctuation and spelling errors. There will be a reduction in points for the above mentioned errors. Late assignments are not accepted. Prepare carefully for class, and be ready to discuss readings and assignments thoughtfully. Note the Description of Exemplary Students on page 18.

1. Participation, Professionalism and Disposition	5%
2. Reading Accountability Journal	20%
3. Framework Summary Response	5%
4. Leadership of Hands-on Science Activities	10%
5. Learning Cycle Lesson Drawings	5%
6. Learning Cycle Lesson Explanations	5%
7. Science Exploratorium Lesson Plan/Presentation	10%
8. Science Curriculum/Presentation	25%
9. Course Reflection	5%
10. Complete Science TPEs during last class	10%

Descriptions of Assignments

1. Participation, Professionalism and Disposition to Teach

5%

Interact professionally and collaborate responsibly with your colleagues and professor. Teacher education is a professional preparation program and students will be expected to adhere to standards of dependability, professionalism, and academic honesty.

You are expected to arrive on time (1:00 p.m.), stay for the whole class (until 3:45 p.m.), and attend all class sessions. If you are late to one or more classes, depart early from one or more classes, or miss a class, your course grade will be lowered. Please note the Attendance policy in this syllabus.

Grading will include a component of “professional demeanor.” Students will conduct themselves in ways that are generally expected of those who are entering the education profession, including the following:

- On-time arrival to all class sessions
- Advance preparation of readings and timely submission of assignments
- Respectful participation with instructor and other students in all settings
- Carefully considered, culturally aware approaches to solution-finding

The following Attributes of Highly Effective Teachers will be used as criteria defining your participation, professionalism and disposition.

- a. **General classroom attendance, promptness, and participation:** is on time; respects time boundaries (breaks, etc.); regularly attends class; and actively participates.
- b. **Attention to classroom discussion protocols:** respects time limitations; recognizes and respects the perspectives of fellow classmates; gives wait time; listens actively; uses non-interruptive skills; mediates disagreements by working to understand others’ perspectives & finding common ground; and genuinely encourages all to participate.
- c. **Social and cooperative skills (as illustrated in cooperative projects):** assumes responsibility of one’s roles; is open to consensus and mediation; effectively communicates ideas; communicates in respectful manner in online discussion (as noted in electronic communication protocol); attends group meetings; is dependable; respects others’ ideas; expects quality work from self and colleagues; manages time effectively; uses organizational skills and leadership skills; is assertive but not aggressive; uses reflection as a means of evaluation; and motivates and offers positive reinforcement to others.
- d. **Attention to assignments:** meets time deadlines; produces quality products; responds cooperatively to constructive criticism; uses rubrics or other stipulated criteria to shape an assignment; and prioritizes tasks and performs/supervises several tasks at once.
- e. **General classroom demeanor:** is professional, creative, kind, sensitive, respectful, has a sense of humor; is supportive of fellow classmates and instructors; recognizes others’ perspectives as valid and works to include all “voices” in the classroom; is aware of & responsive to issues & behaviors that might marginalize colleagues in the classroom; does not conduct personal business during class time; uses personal computer appropriately, clearly taking notes when warranted; and computer is closed during discussions so that eye contact can be maintained.
- f. **Flexibility:** is responsive when reasonable adjustments to the syllabus, curriculum, schedule, and school site assignments become necessary (common to the educational arena); can work through frustrations by problem-solving with others and not letting emotional responses dominate or impair thinking; “bounces” back easily; and can work calmly under stress.
- g. **Openness to and enthusiasm for learning:** can engage with a variety of educational ideas with an open mind and a sense of exploration; demonstrates passion for and metacognition of learning across the curriculum and within discipline areas; and takes advantage of learning opportunities and seeks out additional opportunities for learning.

PCP Rubric: Participation, Collaboration and Professionalism

Students are expected to actively participate, collaborate, and demonstrate professionalism at all times.

	Excellent	Acceptable	Unacceptable	Comments
<p><u>Attitude</u> Do you show a positive attitude toward class, “the work” and learning?</p>	Always displays a positive attitude. May offer constructive criticism and include alternatives that show initiative.	Sometimes displays a positive attitude. May offer constructive criticism and include alternatives that show initiative.	Seldom has a positive attitude. Often is critical. Does not offer alternative solutions to criticism.	
<p><u>Participation</u> Do you participate in class discussions productively, sharing your knowledge and understandings?</p>	Attends every class, always on time and well prepared, and never leaves early. Gives closest attention to class activities & speakers.	Attends every class, on time and prepared, and never leaves early. Gives most attention to class activities and speakers.	Is not always ready when class time begins. Doesn't give full attention in class; sometimes talks when others are speaking.	
<p><u>Professionalism</u> Do you exhibit professional behavior at all times?</p>	Consistently behaves, talks and works in a professional manner, regardless of task/topic.	Most of the time, behaves, talks and works in a professional manner, regardless of task/topic.	Seldom behaves, talks, and works in a professional manner, regardless of task/topic.	
<p><u>Collaboration</u> Can you monitor and adjust your participation to allow for others' ideas to be heard? Are you supportive of others' ideas and work?</p>	Consistently listens to, shares with, and supports the efforts of others. Tries to keep people working well together.	Most of the time listens to, shares with, and supports the efforts of others, but sometimes is not a good team member.	Rarely listens to, shares with, and supports the efforts of others. Is not always a good team player.	
<p><u>Contributions</u> Do you contribute to whole class and group work? Do you “do your share”?</p>	Consistently provides useful ideas; always stays focused on the task. Exhibits a lot of effort and valuable contributions.	Most of the time provides useful ideas and stays focused. A satisfactory group member who does what is required.	Rarely provides useful ideas; not always focused. Reluctant to participate. Lets others take charge.	
<p><u>Disposition toward teaching</u> Do you exhibit a positive disposition towards teaching all students?</p>	Consistently demonstrates concern in learning to teach all children. Always demonstrates strong commitment toward developing (a) an understanding of children, (b) teaching strategies, and (c) knowledge of the CA Standards for the Teaching Profession (CSTP), Teacher Performance Expectations (TPE), and CA Standards.	Most of the time demonstrates concern in learning to teach all children. Often demonstrates commitment toward developing (a) an understanding of children, (b) teaching strategies, and (c) knowledge of the CSTP's, TPE's, and CA Content Standards.	Rarely shows concern in learning to teach all children. Rarely demonstrates commitment toward developing (a) an understanding of children, (b) teaching strategies, and (c) knowledge of the CSTP's, TPE's, and CA Content Standards.	
<p><u>Leadership</u> Do you interact productively with your peers and show leadership initiative?</p>	Shows strength through leadership in class activities; other students respect you as a leader.	Effectively participates and contributes, but rarely shows leadership qualities.	Does not show leadership in any area of class.	

2. Reading Accountability Journal Entries for Ch. 2-21 (individual) 20%

The assigned readings provide an important foundation for your increasing understanding of how to effectively teach science. To aid you in remembering the readings, and assist you with meaningful class participation, you are asked to respond to each reading assignment by coming to class with a 1-2 page entry in your Reading Accountability Journal. (You will need to large Blue Books). Reading accountability journals (blue books) will be collected at every other class session and will only receive full points if completed by the date indicated in the schedule. You must use Blue books; though you may type and staple in your entry. Spiral paper stuck in Blue Books will not be accepted.

For each of chapters 2-21, complete one of the following in a large Blue Book:

- a. Prepare a concept map (10-15 concepts with linking words), using correct **concept mapping procedures taught in class** or
 - b. Prepare a Big Ideas "paper" explaining the key science concepts (**sentence form, not outlines**)
- Put your name at the top of each page

Grading: Maximum of 5 pts. for each chapter's concepts. 20 CHAPTERS X 5 PTS=100 PTS

Note: If you do Concept Maps, you should follow instructions for Concept Mapping given in class:

- Most general, inclusive Concept at top
- Map must show hierarchy
- 1-2 words (nouns) for Concepts
- Verbs or prepositions for Linking Words between Concepts
- NOT mind-mapping or mind-webbing

3. Framework Summary Response (individual) 5%

Read the first part of the California Science Framework, up to page 22. This includes Board Policy, the Introduction and Chapters One and Two.

- Think about the reading holistically.
- Type about a page, in your own words, that answers these questions: What were the most important ideas addressed in the reading? How does science teaching differ from instruction in other subjects? What are the most important elements of a strong science instructional program?

Come to class prepared to discuss the questions and turn in your answers.

4. Leadership of Hands-on Science Activities (team)

10%

Students will lead hands-on science lessons during class. The lessons should model inquiry instruction, good questioning skills, and be content-understandable and non-judgmental. The lessons should be based on the CA Science Content Standards. Strategies for English language learners, technology integration, and methods for teaching students with disabilities should be included.

You will work in teams to lead science lessons based on the Learning Cycle Model of Instruction. You will teach these to your classmates. Each lesson will be allocated 35-40 minutes of class time to teach. Your classmates will not role-play elementary students, but will learn the science content and how to teach it. Treat your classmates as teachers, not elementary students.

The lessons should include hands-on lessons, and should emphasize particular science concepts. The Exploration and Application phases of the Learning Cycle require different hands-on science activities using manipulatives. **ALWAYS begin Exploration with students making PREDICTIONS.** Hands-on activities are NOT reading or completing worksheets (though they may require students to read something or complete lab observation sheets). You should take the activities “off of paper” and require students to use the science process skills with science manipulatives. **You need to know and demonstrate the stages of the Learning Cycle, or you will not be given credit for your lesson.**

Be sure you understand the concepts you are emphasizing, and that you can explain them. The lessons should be developmentally appropriate for K-6, and should follow the NSTA Safety Guidelines. **Begin the lesson by writing essential questions about the lesson on the board, for students to consider during the lesson.** These questions should be **higher level questions** (analysis, synthesis or evaluation level) according to Bloom’s Taxonomy. Make sure that you include the **3 stages of the Learning Cycle.** **Begin the lesson with students writing their predictions about the outcomes of the activity.** Make sure that science content background and applications to everyday life are addressed. You need to **EXPLAIN** Strategies for English language learners and adaptations for students with disabilities.

Prepare a PowerPoint Presentation to use in your lesson. The presentation should include a detailed explanation of the science content, as well as a list and definitions of science concepts important to the lesson. Additionally, include a list of at least 3 web sites (with short descriptions) that address the science topic and concepts through simulations, graphics and movies. You should have links to these web sites and show examples during the lesson. **Bring the Children’s literature books to class to show.**

Science Lesson Plan Handout

- Prepare a handout which includes the information under Lesson Plan Format, making sure you include:
 - team members’ names at the top
 - references at the bottom.

IMPORTANT NOTE: At least five full days PRIOR to your team’s presentation, email your complete lesson plan and your PowerPoint Presentation to the instructor for review. (Failure to send these 5 days prior to your presentation will lower your grade one letter grade.) Include your cohort # and the date you will present to the class in the email. After I have approved these, you should make copies of the lesson to bring for classmates on the day of the presentation. You may email them to classmates if you do so 2 days prior to the lesson, provided that you bring extras for students who may forget to bring them.

Please email final lesson plan to knorman@csusm.edu prior to presenting.
On the day of your lesson presentation, please begin the lesson by turning in 1 copy of the rubric completed as a team evaluation along with one paper copy of your lesson plan.

Lesson Plan Format

Lesson Title: What is the title of your lesson?

Grade Level: What is the grade level?

Student Groupings: How will you group students for instruction?

Materials/Resources/Technology: What does the teacher need? What do the students need?

California Science Content Standard(s): What standards are addressed? Include at least 1 science area (life science, physical science, or earth science) standard and 1 investigation standard.

Lesson Objective(s): What do you want students to be able to do?

Write in complete sentences. Use an action verb and explain how students will demonstrate their new knowledge and understanding. "The students will _____."

Science Concept(s): What are you trying to teach? Do not say "The students will ____." (That is an objective, not a concept.)

Essential Questions (higher level; see Bloom's taxonomy): What are your essential questions for this concept? What leads to the big idea? (be sure these are not lower level fact or info. questions)

Lesson Procedures: Explain the procedures for each. Include what the teacher will do and what the students will do.

The Learning Cycle

a. Exploration (Begin with students making predictions; then have a hands-on SCIENCE activity.)

b. Concept Invention (Make sure students share and discuss data and ideas in the first part of this stage; then teacher introduces new terms and provides further explanations.)

c. Concept Application (Should be a 2nd hands-on SCIENCE activity.)

Accommodations/Adaptations/Applications:

- Strategies for English language learners and explanations (at least 3)
- Adaptations for students with disabilities and explanations (at least 3)
- Applications to everyday life and explanations (at least 3)

Science Content Background: (at least 1 full page) summary of the content background

Web Sites: 3 interactive relevant web sites with descriptions

Children's Literature Books: Title, author, publisher, year of 2 children's books on the topic.
BRING BOOKS TO CLASS.

Arts Standards Integration: Explain how you will integrate learning in the Arts. List Arts Standard.

References: Title, author, publisher, year

Team completes prior to presenting as a self-evaluation. Turn in with lesson plan before you present.

RUBRIC FOR HANDS-ON SCIENCE LESSONS

Title of Lesson: _____

Names: _____

Activity	Criteria/ Quality of Work	Score
<u>Materials</u> 5pts	Materials were provided so that all students could easily participate - 5 pts. Materials were provided so that some students could easily participate - 3 pts. Materials were provided so that a few students could easily participate - 1 pt. Materials were not provided so that students could easily participate - 0 pt. (5 points maximum)	
<u>Standards Objectives Concept(s)</u> 5pts	You included the California Content Standards, Lesson Objectives and a Statement of the Science Content. (5 points maximum)	
<u>Essential Questions</u> 5pts	You included 2 essential questions in the lesson, asking about the "big idea." These were not simple knowledge or application questions, but questions relating the lesson to the big idea (5 points maximum)	
<u>Concept Exploration</u> 10pts	1) All students participated in a developmentally appropriate hands-on science activity, made observations, and collected data. Predictions were made at beginning 2) Are children provided with hands-on activities (sometimes problem solving) prior to being introduced to the new ideas? 3) Do the exploration activities elicit children ideas relative to those activities? 4) Are the exploration activities clear lead-in's to the introduction of the idea? That is, do the exploration activities provide the experiences children need to meaningfully grasp the new idea when that new idea is presented? 5) Is there a likelihood that the children will come up with the key idea as a consequence of the exploration activities? (2 points for each of the above)	
<u>Concept Invention</u> 10pts	1) Students shared their observations, data and explanations. Teacher provided further explanations and terminology, and tied it all together. 2) When the new idea or skill is introduced, does the teacher directly relate the presentation to what children have experienced in the exploration activity? 3) Does the teacher attempt to elicit the key idea from the children before presenting that idea? 4) Is there an attempt by the teacher to check on children's understanding of the newly presented concept or skill? 5) Is there an attempt by the teacher to give children an example of what the concept is not? (2 points for each of the above)	

<u>Science Content Background</u> 10 pts	Your team provided a thorough explanation of the science content background in the PP presentation - 10 pts. Your team provided a short explanation of the science content background - 6 pts. Your team provided an incomplete explanation of the science content background - 2 pts. Your team provided a poor explanation of the science content background - 0 pts. (10 points maximum)	
<u>Relevant Web Sites</u> 10 pts	Your PP presentation and lesson plan included 3 web sites with descriptions and links to the sites.	
<u>Concept Application</u> 10 pts	1) Are hands-on activities used in the application/elaboration stage? 2) Are there explicit attempts to offer children corrective and confirmatory feedback? 3) Will any new element (refinement) be added to broaden and deepen children's understanding or skill? 4) Can the application/elaboration activities serve as exploration activities for a new idea? (2.5 points for each)	
<u>Strategies for English language learners</u> 5 pts	3 strategies for English language learners are explained	
<u>Applications to real life</u> 5 points	3 applications to everyday life are described	
<u>Adaptations for Students with Disabilities</u> 5 points	3 adaptations to meet the needs of students with disabilities are included (separate from other strategies)	
<u>Arts</u> 5pts	You integrated one or more arts standards in a meaningful way – 5 pts. Arts included, but did not include standards – 3 pts. Little relation to the arts – 1 pt.	
<u>Handout</u> 10 pts	Handout included everything listed for lesson plan (1 points off for each missing item)	
<u>Presentation</u> 5 pts	Your team is ready to present on time , has all materials ready and all handouts copied, and will stay within the time allocated. You will keep students on-task and not waste time - 5 pts. Your team accomplished some of the items listed - 3 pts. Your team accomplished few of the items listed - 1 pts. Your team did not accomplish any of the items listed - 0 pts. (5 points maximum)	
	TOTAL POINTS/100	

5. Learning Cycle Lesson Drawings (individual) 5%

In Blue Book #3 (or Lab Book)--After each Learning Cycle presentation, you will make a drawing illustrating what you learned during the lesson. Title it with the title of the lesson. Be sure to pay attention during the lesson so that you have something to draw and so that your drawing illustrates your understanding of the lesson. You must **label** parts of drawings. **Drawings should illustrate the major science concepts** that students were supposed to learn. Drawings will be assessed based on criteria:

- Does the Drawing illustrate the major science concepts taught in the lesson?
- Does the Drawing include labels?
- Does the Drawing make “sense”? Can one look at it and understand what was taught?

6. Learning Cycle Lesson Explanations (individual) 5%

In Blue Book #3 (or Lab Book)—On the page immediately after each Learning Cycle Lesson Drawing, you will write an explanation of the science concepts taught, ½-1 page in length. Be sure to pay attention during the lesson so that you have something to explain! Your explanations should be a complete description of the major science concepts that students were to learn. Explanations will be assessed based on these criteria:

- Does the Explanation describe the major science concepts taught in the lesson?
- Does the Explanation make “sense”? Can one read it and understand what was taught?
- Is each Explanation on a separate page from the drawings and the other explanations?

7. Science Exploratorium Lesson Plan/Presentation (pairs) 10%

Develop an inquiry activity to teach to elementary students. You may work in pairs on this assignment. You will prepare a hands-on science lesson and poster about a science concept. You will present the lesson at our Elementary School Science Exploratorium. Be sure you understand the concept(s) you are emphasizing, and that you can explain them. Prior to teaching the lesson, turn it in to your instructor for review. The lessons should include hands-on lessons, and should emphasize particular science concepts. The Exploration and Application phases of the Learning Cycle must require different hands-on science activities using manipulatives. Hands-on activities are NOT reading or completing worksheets (though they may require students to read something or complete lab observation sheets). You should take the activities “off of paper” and require students to use the science process skills with science manipulatives.) Type a 1 page abbreviated Lesson Plan with your names at the top and REFERENCES at the bottom. Prior to the Exploratorium, turn in the completed self-evaluation rubric.

Lesson Plan Format

Lesson Title: What is the title of your lesson?

Lesson Objective(s): What do you want students to be able to do?

Write in complete sentences. Use an action verb and explain how students will demonstrate their new knowledge and understanding. “The students will _____.”

Science Concept(s): What are you trying to teach?

Do not say “The students will _____.” (That is an objective, not a science concept.)

Essential Question(s): What are your essential question(s) for this concept?

Materials/Resources/Technology: What does the teacher need? What do the students need?

Lesson Procedures: BRIEFLY explain the procedures for each. Include what the teacher will do and what the students will do.

Learning Cycle:

a. Exploration (Begin with students making predictions; then have a hands-on SCIENCE activity.)

b. Concept Invention (Make sure students share and discuss data and ideas in the first part of this stage; then teacher introduces new terms and provides further explanations.)

c. Concept Application (Should be a 2nd hands-on SCIENCE activity.)

References: Title, author, publisher, year of resources

We will share Exploratorium plans so that all students leave with plans for all lessons, which you may use during student teaching.

Pair completes prior to presenting as a self-evaluation. Turn in the day of Exploratorium before it starts..

RUBRIC FOR ACTIVITY, POSTER AND PRESENTATION-Science Exploratorium

Score	Criteria	Quality of Work		
		Excellent	Acceptable	Unacceptable
_____	<u>Visual Display</u>	3-sided visual display shows great creativity and is thought-provoking. Graphically demonstrates concept. Max of 10 points	3 sided visual display shows creativity and thoughtfulness; has graphics or pictures. 5 points	Visual display is present, but required little imagination or creativity. 0 points
_____	<u>Timing</u>	You can easily adjust your teaching to the time allocated. Your project allows for great flexibility. Max of 10 points	You can adjust somewhat to the time allotted. Your project allows for some flexibility. 5 points	You cannot easily adjust your teaching to the time allocated. Your project allows for little flexibility. 0 points
_____	<u>Student Data Sheet</u>	You have copies of data sheet for all students. Max of 10 points	You have data sheets, but not for all students. 5 points	You will not require students to keep data. 0 points
_____	<u>Materials</u>	You have necessary materials for all students to participate in hands-on lesson. Max of 10 points	You have necessary materials for some students to participate in hands-on lesson. 5 points	You have materials for demonstrations only. 0 points
_____	<u>Your Understanding</u>	It is obvious that you have a complete and thorough understanding of the science content. Max of 20 points	You do not have a complete understanding of the science content. 10 points	You have misconceptions about the science content. 0 points
_____	<u>Your lesson</u>	Learning Cycle Lesson is (a) hands-on, (b) developmentally appropriate, & (c) feasible for all students. Max of 20 points	Two of the 3 characteristics are present. 10 points	Teacher does a hands-on activity for students. 0 points
_____	<u>Dress & Professionalism</u>	Your clothing, accessories and manners, as well as your behaviors, demonstrate the highest level of professionalism. Max of 20 points	Your clothing, accessories and manners, as well as your behaviors, demonstrate professionalism. 10 points	Your clothing and behaviors are not that of a professional, and you do not represent CSUSM in the best possible manner (no jeans, shorts, short tops, short pants, hats, gum, cell phone) 0 points

Total points _____

8. Science Curriculum/Presentation (team)

25%

The goal of this assignment is for you to develop year-long plans for instruction in science based on the California Science Content Standards, as well as develop skills for teaching in the elementary grades. For this assignment, you will plan a year of science instruction for one grade level, based on the California Science Content Standards. You will divide the Science Content Standards for one grade level into five units. For each unit, you will use the science standards (and their descriptions in the Science Framework) to design enduring understandings, desired outcomes, end-of-unit assessments, and rubrics to use in grading the assessments. For the final part of this assignment you will create three learning cycle lessons for each unit, based on the Science Standards, Enduring Understandings, Desired Outcomes and Final Assessments in the units. You will work in a group with partners of your choosing; you will work in the same group for your project in your science course. You will relate the science course project topic to this Science Curriculum Plan.

When you complete this assignment, you will have a curriculum plan for teaching the science standards, units and lessons for teaching science for a full year for one grade level. We will share these, so that everyone leaves with curriculum plans, units and lessons for a full year of teaching science at all grade levels. You may share these with your cooperating teachers and use them in your student teaching.

Year-Long Science Curriculum

Grade: _____

Unit Title _____

1. Timeline in weeks _____

2. Standards

Content (Physical, Life, Earth Science)Standards
Investigation and Experimentation Standards

3. Enduring Understandings (what you hope students remember and understand next year)

4. Desired Outcomes (what students can DO after instruction)

5. Final Summative Assessment over Unit (end of unit assessment over the whole unit, all standards)

6. Rubric listing Criteria that you will look for in Final Assessment

Rubric over Final Assessment

Criteria	Exceeds Expectations	Meets Expectations	Below Expectations	Points Comments

7. Ideas for 3 Lessons for each Unit-

Each Lesson should include:

1. Title
2. Standard numbers
3. Ideas for
 - a. Exploration (2-3 lines)
(Begin with students making predictions; then have a hands-on SCIENCE activity.)
 - b. Concept Invention (2-3 lines)
(Make sure students share and discuss data and ideas in the first part of this stage; then teacher introduces new terms and provides further explanations.)
 - c. Concept Application (2-3 lines)
(Should be a 2nd hands-on SCIENCE activity.)

Team completes as a self-evaluation. Turn in 1 copy per team with Science Curriculum.

Rubric for Year-Long Science Curriculum

Page 1 of 2

Your names: _____

Grade: _____

Each Unit counts 20 points. (5 units total)

	<u>Unit 1</u>	<u>Unit 2</u>	<u>Unit 3</u>	<u>Unit 4</u>	<u>Unit 5</u>
Unit Titles					
Unit Timeline in weeks (1 pt each unit)					
Content Standards for each unit (1 pt each unit)					
Invest./Exper. Standards/unit (1 pt each unit)					
Enduring Understandings (3 points each unit)					
Desired Outcomes (3 points each unit)					
Final Summative Assessment (2 points each unit)					
Rubric over final Assessment listing criteria (3 points/unit)					
<u>Lessons for each Unit:</u> <u>Lesson 1</u> (2 points each unit) 1. Title 2. Standard numbers 3. Learning Cycle Stages a. Exploration b. Concept Invention c. Concept Application					
<u>Lesson 2</u> (2 points each unit) 1. Title 2. Standard numbers 3. Learning Cycle Stages a. Exploration b. Concept Invention c. Concept Application					
<u>Lesson 1</u> (2 points each unit) 1. Title 2. Standard numbers 3. Learning Cycle Stages a. Exploration b. Concept Invention c. Concept Application					

For full points-be sure to describe units in the Presentation and lead the class in one mini-lesson from unit.

Page 2 of Rubric for Year-Long Science Curriulum

Checklist:

1. Did you include a listing of complete Content and Investigation and Experimentation Standards? _____
Content (Physical, Life, Earth Science)Standards
Investigation and Experimentation Standards
2. Are your Enduring Understandings what you hope students remember and understand next year? _____
3. Are your Desired Outcomes what students can DO after instruction? _____
4. Is your Summative Assessment a final cumulative assessment over the whole unit, enduring understandings, desired outcomes, and all standards? _____
5. Does your rubric have a list of Criteria that you will look for in the Final Assessment, with levels of achievement (such as exceeds, meets, does not meet expectations)? _____
6. Do you have 3 lessons in each unit? _____
7. Did you include the standards in each lesson? (be sure to include at least standard numbers) _____
8. Did you include the 3 stages of the Learning Cycle? _____
9. Did you begin your Explorations with students making predictions? _____
10. Did your Explorations all have a hands-on science activity? _____
11. Did you begin each Concept Invention with students sharing and discussing data and ideas? _____
12. Did you include teacher introducing new terms and providing further explanations during the second part of Concept Invention? _____
13. Did you include a 2nd hands-on science activity in each Concept Application? _____

NOTE: For your presentation, go over major components, describe each unit, and lead the class in 1 mini-lesson (using science materials).

9. Course Reflection (individual) 5%

Instructions will be given Apr. 9, and time will be given during this class to work on the reflections. Typed course reflections will be due Apr. 30.

10. **Completion Science TPEs in Class** (individual)

10%

This will be the final class activity, completed in a computer lab. Bring a printer card to class, and turn in a printout of your TPE responses to the instructor, prior to leaving, for your grade.

Science Methods TPE Instructions

TPE 1A: Teaching Science in a Multiple Subject Assignment

Candidates for a Multiple Subject Teaching Credential demonstrate the ability to teach the state-adopted academic content standards for students in science (K-8). They balance the focus of instruction between science information, concepts, and investigations. Their explanations, demonstrations, and class activities serve to illustrate science concepts and principles, scientific investigation, and experimentation. Candidates emphasize the importance of accuracy, precision, and estimation.

TPE 5: Student Engagement

Candidates for Teaching Credentials clearly communicate instructional objectives to students. They ensure the active and equitable participation of all students. They ensure that students understand what they are to do during instruction and monitor student progress toward academic goals. If students are struggling and off-task, candidates examine why and use strategies to re-engage them. Candidates encourage students to share and examine points of view during lessons. They use community resources, student experiences, and applied learning activities to make instruction relevant. They extend the intellectual quality of student thinking by asking stimulating questions and challenging student ideas. Candidates teach students to respond to and frame meaningful questions.

FOR EACH TPE:

1st paragraph—

An introductory paragraph in which you re-state the TPE in your own words and personalize it (Use “I”).

You might say things like

Educators.....

As a future teacher, I

It is important to

2nd paragraph---

As you write, the goals are to

- describe your learning, skills and knowledge as they relate to the TPE
- analyze your completion of assignment(s) and explain how your completion of assignment meets the TPE
- reflect on the significance of your learning (the “so what?”)
- describe where you need to go next related to the TPE (extension or “beyond” the TPE)

3rd paragraph—

Discuss the evidence that you have attached and how it shows the learning and meeting of the TPEs discussed in paragraph 2. Have at least 2 attachments (pieces of evidence) for EACH TPE.

4th paragraph---

Have a concluding paragraph about the importance of science and teaching science using the skills and knowledge mentioned in the TPE. Reflect upon and summarize the significance of your learning overall (connected to the TPE) and explain what you still need to learn related to this TPE.

Example:

For TPE 5 (Student Engagement), you might relate it to the investigation you led at the Exploratorium.

Your evidence (attachments) might be any 2 of the following:

1. Lesson Plan for Exploratorium
2. Reflection on Exploratorium teaching (Include what you did well, what didn't go so well, and how you can improve.)
3. Self-Assessment Rubric
4. Picture(s) of Your Project
5. Videotape clip of Your Teaching

Cooperative Learning Roles for Science Group Members:

- Materials Manager
- Reporter
- Recorder
- Timekeeper/Taskmaster
- Lead Investigator

Heterogeneous groups are best. The teacher assigns the group members and the roles; roles are rotated.

Compassionate Communication

We will be including a study of Rachel Lamb's booklet *Communication Basics: An Overview of Nonviolent Communication*. This booklet is published by the Center for Nonviolent Communication. In Nonviolent Communication (also called Compassionate Communication), Marshall Rosenberg presents his approach to communication that centers on compassionate connection. Marshall encourages all individuals, and especially educators, to motivate "by a reverence for life." Rosenberg's Compassionate Communication process offers educators the tools to create exceptional learning environments.

Compassionate Communication (also called Nonviolent Communication) will help you:

- Maximize the individual potential of all students
- Improve trust and connection in your classroom community
- Strengthen student interest, retention and connection to their work
- Find cooperation without using demands
- Improve classroom teamwork, efficiency and results

Marshall B. Rosenberg, Ph.D. is the internationally acclaimed author of *Nonviolent Communication: A Language of Life*, and *Speak Peace in a World of Conflict*. He is the founder and educational director of the Center for Nonviolent Communication (CNVC). He travels throughout the world promoting peace by teaching these remarkably effective communication and conflict resolution skills. See www.cnvc.org resources for additional books and resources on how to use compassionate communication in teaching.

Exemplary "A" Students

1. Demonstrate serious commitment to their learning, making full use of the learning opportunities available and searching out the implications of their learning for future use.
2. Complete all assignments thoroughly, thoughtfully and timely.
3. Make insightful connections between assignments and their developing overall understanding of social studies concepts; continually question and examine assumptions in a genuine spirit of inquiry.
4. Show high level achievement of course goals.
5. Display a "can do" attitude, give 100%, and work to help others learn too.

"B" Students

1. Completes all or almost all assignments, all or most on time, and demonstrates the ability to summarize, analyze, and/or reflect at fairly high levels, showing consistent improvement over time.
2. Completes all or most of the reading assignments and develops thoughtful and fairly thorough responses.
3. Produces work that is close to professional level in terms of both content and writing, working to develop a strong command of writing, speaking, planning and presenting.
4. Develops presentations, demonstrating significant learning
5. Presents confidently and intelligently, demonstrating effective teaching skills.
6. Attends almost every class meeting and is regularly engaged during class.
7. Contributes to the positive environment of the class by respecting all members.

Bloom's Hierarchy

Knowledge	<ul style="list-style-type: none">• observation and recall of information• knowledge of dates, events, places• knowledge of major ideas• mastery of subject matter• <i>Question Cues:</i> list, define, tell, describe, identify, show, label, collect, examine, tabulate, quote, name, who, when, where, etc.
Comprehension	<ul style="list-style-type: none">• understanding information• grasp meaning• translate knowledge into new context• interpret facts, compare, contrast• order, group, infer causes• predict consequences• <i>Question Cues:</i> summarize, describe, interpret, contrast, predict, associate, distinguish, estimate, differentiate, discuss, extend
Application	<ul style="list-style-type: none">• use information• use methods, concepts, theories in new situations• solve problems using required skills or knowledge• <i>Questions Cues:</i> apply, demonstrate, calculate, complete, illustrate, show, solve, examine, modify, relate, change, classify, experiment, discover
Analysis	<ul style="list-style-type: none">• seeing patterns• organization of parts• recognition of hidden meanings• identification of components• <i>Question Cues:</i> analyze, separate, order, explain, connect, classify, arrange, divide, compare, select, explain, infer

<p>Synthesis</p>	<ul style="list-style-type: none"> • use old ideas to create new ones • generalize from given facts • relate knowledge from several areas • predict, draw conclusions • <i>Question Cues:</i> combine, integrate, modify, rearrange, substitute, plan, create, design, invent, what if?, compose, formulate, prepare, generalize, rewrite
<p>Evaluation</p>	<ul style="list-style-type: none"> • compare and discriminate between ideas • assess value of theories, presentations • make choices based on reasoned argument • verify value of evidence • recognize subjectivity • <i>Question Cues</i> assess, decide, rank, grade, test, measure, recommend, convince, select, judge, explain, discriminate, support, conclude, compare, summarize

SB 2042 - AUTHORIZATION TO TEACH ENGLISH LEARNERS COMPETENCIES

PART 1: LANGUAGE STRUCTURE AND FIRST- AND SECOND-LANGUAGE DEVELOPMENT	PART 2: METHODOLOGY OF BILINGUAL, ENGLISH LANGUAGE DEVELOPMENT, AND CONTENT INSTRUCTION	PART 3: CULTURE AND CULTURAL DIVERSITY
I. Language Structure and Use: Universals and Differences (including the structure of English)	I. Theories and Methods of Bilingual Education	I. The Nature of Culture
A. The sound systems of language (phonology)	A. Foundations	A. Definitions of culture
B. Word formation (morphology)	B. Organizational models: What works for whom?	B. Perceptions of culture
C. Syntax	C. Instructional strategies	C. Intra-group differences (e.g., ethnicity, race, generations, and micro-cultures)
D. Word meaning (semantics)	II. Theories and Methods for Instruction In and Through English	D. Physical geography and its effects on culture
E. Language in context	A. Teacher delivery for <u>both</u> English language development <u>and</u> content instruction	E. Cultural congruence
F. Written discourse	B. Approaches with a focus on English language development	II. Manifestations of Culture: Learning About Students
G. Oral discourse	C. Approaches with a focus on content area instruction (specially designed academic instruction delivered in English)	A. What teachers should learn about their students
H. Nonverbal communication	D. Working with paraprofessionals	B. How teachers can learn about their students
I. Language Change		C. How teachers can use what they learn about their students (culturally responsive pedagogy)
II. Theories and Factors in First- and Second-Language Development	III. Language and Content Area Assessment	III. Cultural Contact
A. Historical and current theories and models of language analysis that have implications for second-language development and pedagogy	A. Purpose	A. Concepts of cultural contact
B. Psychological factors affecting first- and second-language development	B. Methods	B. Stages of individual cultural contact
C. Socio-cultural factors affecting first- and second-language development	C. State mandates	C. The dynamics of prejudice
D. Pedagogical factors affecting first- and second-language development	D. Limitations of assessment	D. Strategies for conflict resolution
E. Political factors affecting first- and second-language development	E. Technical concepts	IV. Cultural Diversity in U.S. and CA.
		A. Historical perspectives
		B. Demography
		C. Migration and immigration
